Web integration project

EcoArt

A modern, accessible, mobile-first website for eco-responsible craft objects.

Pure CSS | Grid + Flexbox | Mobile-first | WCAG accessibility

The brief

The client

Ecoart promotes and sells craft objects made from recycled materials. The startup Nexora builds the new website.

The goal

A modern, fluid and fully accessible site, built with the best practices of web integration.

The rules

Native CSS only, mobile-first, WCAG accessibility, Git and GitHub, deployed online.

5 pages : Accuel, Catalogue. services. Artisans. Impact & conatact

One design system for the whole site

Forest
text, buttons

Mint
page background

Card
cards, panels

Terracotta
accent, 2nd button

Grey-green
secondary text

Dark forest
button hover

Type

Space Grotesk, with a hero title that scales from 32 to 56 px.

Spacing

An 8-point scale: 8, 16, 24, 32, 48, 64, 96 px.

Shape

8 px corners on buttons, 16 px on cards.

Mobile-first: one layout that grows

up to 767 px

Phone

1 column and a menu button.

from 768 px

Tablet

2 columns, key figures side by side.

from 1024 px

Laptop

4 columns, hero text next to the photo.

from 1280 px

Big screen

More space between sections.

We write the phone CSS first, then add **@media (min-width: …)** rules for bigger screens.

How the code is organised

CSS files:

animation.css
reponsive.css
variables.css
navbar.css
style.css
produit.css
services.css
artisans.css
impact.css

semantic elements

header
footer
main
nav
section
button
article...

variables.css

```
--color-primary: #14422D;
--space-3: 1.5rem;
```

style.css

```
.grid { display: grid;
gap: var(--space-3); }
```

responsive.css

```
@media (min-width: 768px) {
.grid-4 { grid-template-columns:
repeat(2, 1fr); } }
```

Accessibility and teamwork

Accessible to everyone

- A skip link and a visible focus outline for the Tab key
- An alt text on every image
- Clear labels on buttons, and aria-current on the active page
- Main text contrast above 10:1

Working as a team

- Git with feature/* branches
- Code review of a teammate's work
- Figma mockups and prototype
- Deployed on GitHub Pages

Live demo, then your questions

1. Phone view and the menu

2. Resize: tablet, laptop, big screen

3. Keyboard navigation with Tab
